

QUALITY POLICY

The main activity of Innomed Medical Zrt. is the development, production, distribution and servicing of medical devices on the domestic and international market.

Our main objective is to ensure that the products we design and manufacture, as well as the services we provide, are of high quality and comply with the relevant legislation.

Our aim is to maintain our market leadership in many countries and further improve our recognition where we can.

Our mission is to produce the best medical devices that work reliably and safely, to respond quickly and accurately to our customers' requests, and to continuously expand our after-sales services.

Our most important value is a fair relationship with our partners, which is why we focus on flexibility and fast reaction times, using risk-based, process- and system-oriented thinking as drivers in all situations.

In order to meet quality requirements, we have implemented, apply and continuously improve our quality management system, which complies with the international standards EN ISO 9001:2015 and EN ISO 13485:2016.

Our management system and medical devices comply with the requirements of EU Regulation 2017/745 (MDR).

The management of Innomed Medical Zrt. is committed to the fulfillment and maintenance of the above goals, and therefore fully involves its employees in the operation of the management system, thus making continuous improvement both at the system and device level.

The focus of our quality objectives:

Compliance
Customer satisfaction
Continuous improvement

Budapest, 2024.05.27.
